Cloud AI Engineer

SUMMARY

Cloud AI Engineer with hands-on experience designing and deploying scalable AI-powered cloud systems on AWS and GCP to solve business needs. Skilled in building CI/CD pipelines, managing containers with Docker and Kubernetes, and using Terraform for infrastructure automation. Experienced in DevOps and MLOps, where I support software and ML workloads with focus on reliability, performance, scalability, and cost efficiency for modern and intelligent applications.

CERTIFICATIONS

Amazon Cloud Practitioner – Dec 2023
Microsoft Azure Fundamentals – April 2024
Amazon AI Practitioner - April 2026
Google Associate Cloud Engineer – May 2026

CATEGORY	TOOLS & SKILLS
Cloud Platforms & Architecture	- AWS (EC2, ECS, S3, RDS, Route 53, IAM, CloudFront, ACM, DNS, DynamoDB, ASG, ELB, Step Functions), - Google Cloud (App Engine, Vertex AI, Cloud Run, Cloud Function, Big Query, Dataflow, Cloud SQL, Cloud Spanner)
DevOps & Infrastructure Automation	- Terraform, CloudFormation, Docker, Kubernetes, GitHub Actions, GitLab, CI/CD, AWS Code Pipeline, Version Control (Git)
Machine Learning & AI	- Agentic AI, Cursor, MCP Servers, Vertex AI, Amazon Bedrock, LLM Integration.
Programming & Scripting	- Python, Java, NodeJS, Bash, PowerShell, SQL
Cloud Security & Networking	- IAM, KMS, VPC, Security Groups, SSL/TLS, Network Routing, Monitoring & Logging (CloudWatch, Grafana)
Serverless & Microservices	- AWS Lambda, API Gateway, DynamoDB, Event Bridge, Cloud Functions, Pub/Sub, SNS, SQS, Glue (ETL)
Soft Skills / Professional	- Documentation, Team Collaboration, Cloud Design Thinking,
Additional Tools & Systems	- Linux, Virtualization, System Administration

EXPERIENCE

- Cloud AI Engineer | Vosyn

01/2025 to Present

 - Built production grade cloud environments using Terraform (IaC), Kubernetes, Docker with GitHub Actions based CI/CD pipelines on AWS & GCP, and AI integrated cloud workflows
 - Deployed containerized ML models for audio-processing and NLP using Docker and orchestrated on Vertex AI, Cloud Run and Cloud Run Functions, boosting model performance and scalability.
 - Deployed event driven architectures using AWS Lambda, API Gateway, SQS, SNS and DynamoDB
 - Implementing monitoring, alerting workflows using CloudWatch
 - Educated and collaborated with technical and non-technical teams on design or ideas to ensure technical solutions meet business value.
- Associate Cloud Engineer (Apprentice) | VisualPath Training & Consulting

09/2023 to 09/2024

 - Architected highly available and fault-tolerant AWS managed systems utilizing Route53, ELB, EBS, RDS, ActiveMQ, and ElastiCache; reduced operational overhead and enhanced reliability during peak traffic periods.
 - Executed lift-and-shift migrations of legacy on-premises applications to AWS, leveraging EC2 to transition workloads while maintaining architectural integrity.
 - Designed and implemented VPCs and subnets, optimizing network isolation, security posture, and internal traffic flow.
 - Leveraged Terraform/CloudFormation to deploy a serverless workflow using AWS Lambda, API Gateway, and DynamoDB to boost performance.
 - Engineered GitHub Actions and AWS Code pipeline for software delivery, checks and automate deployment.
 - Designed a highly available microservice architecture leveraging Nginx, Docker, MongoDB and RDS.
 - Collaborated with business stakeholders and other developers to evaluate trade-offs across cost, reliability, and performance, influencing cloud service selection and architectural decisions.
- UI/UX Designer | New Horizons Computers

09/2020 to 09/2023

 - Responsible for the design of digital products. I bridged the gap between user needs and business goals by conducting research, creating wireframes, and developing high-fidelity interactive prototypes.
- Mathematics & Computer Science Teacher | Command Secondary School

09/2018 to 08/2020

 - Delivered lessons for Years 10-14 in Mathematics and Computer Study, where I taught students about basic computer knowledge and mathematics.

EDUCATION

Master's Engineering	Memorial University	2024 to 2025
Bachelor's Engineering	Covenant University	2012 to 2018
